True refinement of mind must, in a measure, be original. There is a difference between it and taste, taste being altogether the effect of education; and this refinement, or property of mind, being the immortal fire implanted in nature by God. A man can by education acquire a polite taste, and be able to judge of things by certain established rules, without his soul admitting the beauty of the object judged, or experiencing one single pleasure in viewing it. It must be admitted that, if the soul experiences no joy or pleasure,
